In cases	of tow	ns who	ere th lcular	ere h	as been an a e birth and de	Snorms	d moveme	nt of p	populat	lon, it	is likel	y that t	he pop	oulation	estimat	tes may	not be

sufficiently reliable for calculating the birth and death rates.

Explanation of symbols used:—B.=Births; B.R.=Birth Rate; C.=Cholera; S.=Smallpox; P.=Plague; F.=Pevers; D.D.=Dysentery and Diarrhoea; R.D.=Respiratory Diseases; M.D.=Maternal Deaths; D.R.=Death Rate; I.D.=Infantile Deaths (included in total deaths); ...=Nil information.

REMARKS

The figures of births and deaths shown in this statement for week ending the 9th July, 1955 relate to 170 towns with an estimated population of 20,038 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 57% of the total number of towns representing 51% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 12,451 and 5,211 representing birth and death rates of 32.3 and 13.5 per thousand of population, respectively.

(a) States (Parts A & C).—The data here relate to 144 towns with an estimated population of 16.015 thousands. Information about Ajmer, Assam, Bihar, Bombay, and West Bengal could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 57% of the total number of towns representing 49% of the total population is covered. The number of births and deaths

recorded in these towns were 10,658 and 4,479 representing birth rates and death rates of 34.6 and 14.5 per thousand of population, respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Parts B).—The data here relate to 26 towns with an estimated population of 4,023 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 54% of the total number of towns representing 63% of the total population is covered. The number of births and deaths recorded in these towns were 1,793 and 732 representing birth and death rates of 23.2 and 9.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
